Consolidated Tin Mines completes Mt Garnet Project drilling program

Australian tin exploration company Consolidated Tin Mines (ASX: CSD) (Consolidated Tin, the Company) is pleased to advise that it has completed its current drilling program at the Company's Mt Garnet Project area in northern Queensland.

Assays from the drilling have now been sent to Burnie Laboratories in Tasmania for assaying and Consolidated Tin will release results to the market, as they become available in the very near future.

The program commenced in late June and targeted the Company's three key deposits, Gillian, Pinnacles and Deadmans Gully, and was designed to provide verification of existing data and obtain material to commence detailed metallurgical testing.

Also, recent rock chip sampling by Consolidated Tin had produced anomalous iron values of 30%–50% and as such the drilling also tested for iron.

The Mt Garnet Project area is located around 200km south west of Cairns in one of Australia's premier tin fields and already has a JORC compliant indicated resource of 2.3Mt at 0.8% tin (for 18,000t of contained tin metal), at the Gillian deposit.

Consolidated Tin managing director Mr Ralph De Lacey said that he was very pleased about the early indications of results from the drill program and that he looked forward to having the results released to the market soon.

The information contained in this report that relates to assay results of rock samples and drill chips, to mineral resource estimates and to ore reserve estimates of mineralisation has been approved for release by John Sainsbury (BSc, MaudIMM). John Sainsbury is a geologist of 30 years experience and has sufficient experience in the type of mineralisation under consideration to be a Competent Person as defined by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves - JORC Code, 2004 Edition. John Sainsbury is an executive director of Consolidated Tin Mines Limited. John Sainsbury has consented to the inclusion of this information in the form and context in which it appears.

About Consolidated Tin Mines

Consolidated Tin Mines listed on the ASX in February this year with projects in one of the premier tin producing fields in Australia, and the Company is focused on discovering and developing major tin deposits in northern Queensland.

The company has acquired an impressive portfolio of advanced tin exploration projects in the southern Herberton tin field for development and transformation into a successful mining operation, to provide increased shareholder returns.

Consolidated Tin is driven by an experienced board of directors with a proven record of successful exploration and mining. The Company's vision is to become the premier hard rock tin producer in Queensland.
