Airborne Magnetic Survey of Mt Garnet Tin Project Area Completed

Australian tin exploration company Consolidated Tin Mines (ASX: CSD) (Consolidated Tin, the Company) is pleased to advise that a detailed airborne magnetic and radiometric survey of the Company's Mt Garnet Tin Project area in northern Queensland has been completed.

The survey is intended to better delineate the tin bearing iron rich skarn, provide data for depth modeling and define regional mineralisation controls within the Project area.

The company has engaged UTS Geophysics to perform the detailed survey.

The survey was carried out over the Company's three key project areas of Gillian, Pinnacles and Deadman's Gully as shown on the attached map. The Gillian deposit has a JORC compliant indicated resource of 2.3Mt at 0.8% tin (for 18,000t of contained tin metal).

Results of the airborne magnetic survey will be announced as they come to hand.

On the 25th of June Consolidated Tin commenced a 27 hole, 2000m of Reverse Circulation (RC) drilling program over the Project area to verify existing data and obtain material to commence detailed metallurgical testing. In addition, recent rock chip sampling by the Company has produced anomalous iron (Fe) values of 30%–50% and as such the drilling program will also test for iron.

The Mt Garnet Project area is located around 110km south west of Cairns in one of Australia's premier tin fields.

The information contained in this report that relates to assay results of rock samples and drill chips, to mineral resource estimates and to ore reserve estimates of mineralisation has been approved for release by John Sainsbury (BSc, AusIMM). John Sainsbury is a geologist of 30 years experience and has sufficient experience in the type of mineralisation under consideration to be a Competent Person as defined by the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves - JORC Code, 2004 Edition. John Sainsbury is an executive director of Consolidated Tin Mines Limited. John Sainsbury has consented to the inclusion of this information in the form and context in which it appears.

About Consolidated Tin Mines

Consolidated Tin Mines listed on the ASX in February this year with projects in one of the premier tin producing fields in Australia, and the Company is focused on discovering and developing major tin deposits in northern Queensland.

The company has acquired an impressive portfolio of advanced tin exploration projects in the southern Herberton tin field for development and transformation into a successful mining operation, to provide increased shareholder returns.

Consolidated Tin is driven by an experienced board of directors with a proven record of successful exploration and mining. The Company's vision is to become the premier hard rock tin producer in Queensland.
